

Using carpet thread (I use red) make a loop along your line. String the thread 3 times around the line (within the loop) and pull it tight (snug). Cut the tag ends to about $\frac{1}{2}$ inch so they don't catch on the line guides when you cast out.

Make them tight enough so the knot does not slid on the tip rod guide when you pull a fish in, but not to tight so it pinches the line.
